

#7: Protect/Limit Access to Login/Admin Areas

- What
 - Add an extra layer of protection to the login area
 - Basic Access Authentication
 - Captcha
- Why/How does it reduce risk?
 - Similar to 2FA/MFA in that it adds an extra layer
- Security principle: *Minimize attack surface* and *Defense-in-Depth*
- Bonus points
 - Limit access to the login/admin areas to specific IP ranges
