#3: Keep Themes/Plugins Up-to-date

- Why/How does it reduce risk?

  - Similar to WordPress core updates, plugin and theme updates can also contain security fixes, removing potential vulnerabilities

- Bonus points

  - Know what you have installed and **why** you have it installed

  - Remove those that are no longer in use (#6t)

  - Limit your plugin/theme use (#13t)

#4: Hosting Provider

If WordPress is the brain, and your content the heart and soul of your site…

…the hosting provider is the rest of the body
